$18 MILLION community goal!

THE FUTURE OF HEALTHCARE IN DELTA

Help Bring MRI to Delta

100% Community Funded

Elevating Care: Bringing MRI Services to Delta

Every day at Delta Hospital, physicians make decisions without an MRI, a tool that belongs in every community hospital. Instead, they work around it. They transfer patients. They wait. But Delta has waited long enough. Home to more than 100,000 people: our community has consistently stepped forward to strengthen Delta Hospital. Today, we have a clear opportunity to do it again by bringing MRI Services to Delta, through our $18 million campaign 100% funded by Delta Hospital and Community Health Foundation.

Your Gift Will Help the Team at the Delta Hospital Campus of Care

- Expand access to critical diagnostic imaging close to home, reducing travel and transfers for patients.
- Support faster diagnoses and treatment, helping improve health outcomes across our community.
- Improve access to care for seniors and vulnerable patients
- Enhance overall hospital care through more efficient patient flow and bed utilization.
- Strengthen healthcare across Delta and the region by supporting physician recruitment and reducing pressure on Fraser Health's MRI network.

Give today

With your support today, we can bring MRI services to Delta and elevate care for our community.

Why MRI Matters

Delta Hospital is a busy community hospital with real constraints. Delta Hospital was built to serve a community of 50,000. Today, it serves more than twice that, and the growth is only escalating. Delta's population is already projected to grow by 26% by 2040. This growth includes families, workers, younger adults, and an increasing number of seniors aging in place. As demand for healthcare rises, so does the need for MRI services. This is not only about clearing a backlog. It is about getting ahead of a problem that grows harder to solve the longer we wait.

5,499
Delta patients had to leave the community for an outpatient MRI

2,000
Residents lacked timely access to MRI services when needed

10,000
Scans will be delivered by Delta's MRI annually

The Solution

In partnership with Fraser Health, a smarter and more cost-effective solution will bring MRI services to Delta Hospital. By renovating space adjacent to the Medical Imaging Department, the new MRI unit will integrate with existing diagnostic services. With planning complete and construction beginning in 2027, MRI services are expected by 2028.

From Vision to Action

This is Delta's moment. Time and again, our community has shown what becomes possible when we come together.

Our community has done this before

- $7.5M toward the Toigo Diagnostic Services Building
- $18.25M raised for the Beedie Long-Term Care Centre
- $8M commitment for the new Jim Pattison Endoscopy Unit

Now we have an opportunity to do it again.

The need is real. The plan is approved.
The solution is ready.

Together, we can bring MRI services to Delta for the first time and elevate care for our community.

DELTA HOSPITAL AND COMMUNITY HEALTH FOUNDATION

Delta Hospital and Community Health Foundation is a not-for-profit organization whose mission is to advocate, fund and promote outstanding healthcare at the Delta Hospital Campus of Care and in the community of Delta. Since 1988, DHCH Foundation has raised over $100 million to ensure the best healthcare possible for our community today and for future generations. Learn more at **www.dhchfoundation.ca**.
